

METHOD AND SYSTEM OF MANUFACTURING
SPECIAL EVENT MEMENTOS

ABSTRACT OF THE DISCLOSURE

5 A memento and a process for manufacturing mementos is disclosed
wherein a rectangular laminated sheet is created by face-mounting a color graphic print
to an acrylic sheet with an optically-clear adhesive. Then, the laminated sheet is
precision-divided into a plurality of discrete mementos with full-bleed imagery
conforming to the size and shape of the sub-images comprising said graphic print. Also
10 disclosed are: (i) methods for customizing such mementos with company logos,
individual names, or other information; (ii) a first embodiment of the invention in the
form of a name badge with a removable film backing and finding that permits the user to
easily detach the finding from the back of the badge and utilize the remainder as a
personalized key fob or luggage tag; and (iii) other embodiments of the invention in the
15 form of golf bag tags, name tags, award plaques, photo frames, and mounting boards for
physical totems and memorabilia.
